

ARKANSAS STATE UNIVERSITY-BEEBE AT A GLANCE

ASU-Beebe, the oldest two-year institution in the state, was established in 1927. In 1955, the campus joined the ASU system.

In 1999 the Arkansas General Assembly established ASU-Heber Springs, a center of ASU-Beebe, and a new campus is being built at Sugarloaf Mountain to serve the needs of Cleburne County.

A 2003 merger with Foothills Technical Institute added ASU-Searcy, a technical campus of ASU-Beebe. An additional 17 acres of property adjacent to the Searcy campus was also acquired and a master planning process has begun.

Since 1965, ASU-Beebe degree programs at the Little Rock Air Force Base have served military and civilian personnel.

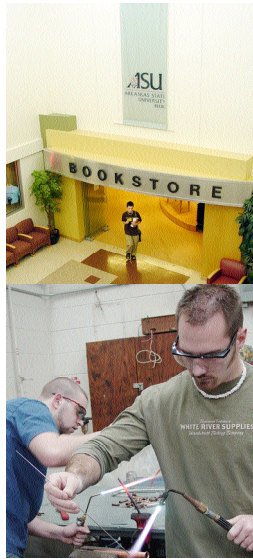

ASU-Beebe's major purpose is to provide affordable, comprehensive, and high-quality instruction and service programs and to continue its tradition of student-centered, service-oriented programs.

ASU-Beebe educates students that are likely to stay in Central Arkansas and contribute to the area's economy and workforce.

ASU-Beebe contributes an estimated \$316 million to the regional income through its operations, capital spending, and a workforce comprised of former students.

ASU Jonesboro offers selected bachelor's and master's degrees on the Beebe campus.

In recent years, ASU-Beebe campuses have annually served more than 5,000 credit students, as well 5,000 non-credit students through continuing education, adult education, industry training, and the high school Area Career Center.

ASU-Beebe offers the state's only veterinary technician program. The John Deere Ag Tech Program is the state's only such program and one of 21 in North America.

ASU-Beebe has offered online educational opportunities since 1999.

ASU-BEEBE DEGREE PROGRAMS

- Accounting • Ag Equipment Technology • Agriculture
- Art • Biological Science • Business Administration
- CADD • Computer Information Systems
- Computer Systems and Networking Technology
- Creative Arts • Criminal Justice • Economics
- Education • English • General Technology
- Health • History • Hospitality Administration
- International Studies • Math
- Medical Laboratory Technology • Music
